Student T4 Interview

Health worker

I understand that your daughter missed school on the 26th. Can you tell me why she was absent?

Parent

She woke up before her alarm clock went off and complained that she felt sick in her stomach. About an hour later she threw up and so I kept her home.

Health worker

I see. How is she doing now?

Parent

She is better. She missed two days of school though and is now getting caught up.

Student T6 Interview

Health worker

Did you notice why your son visited school on May 23 and 27th?

Parent

Yes, he had the flu.

Health worker

Did he see his doctor?

Parent

No, but I think he caught the flu from his friend who was also sick at the same time.

Health worker

Okay. After being exposed to the flu, it generally takes three to five days for symptoms to show up.

Student T10 Interview

Health worker

Why was your son absent from school on May 23 and 27th?

Parent

He came home from the band competition and complained that he was feeling sick. The next day he felt worse. I took his temperature and found that he had a fever, so I kept him home. I think he has food poisoning. You should check out the restaurant he ate at.

Health worker

I suppose it could be food poisoning. Symptoms of food poisoning usually appear in the first two or three days after eating contaminated food.

Student T12 Interview

Health worker

Did you notice why your son visited school on May 23 and 27th?

Parent

Yes, I had a boil develop at school.

Health worker

Mmm... Did you get it treated at school?

Parent

Yeah, I got it treated there.

Health worker

Well, I'm glad it's doing better!

Student JF Interview

Health worker

Can you tell me why your daughter missed school on May 26 and 27?

Parent

She woke up with a stomach ache and spent the whole morning in the bathroom. Later, she developed a fever and a headache. Do you think it is anything serious?

Health worker

We're concerned that the absent students may all have the same illness. I'll be sure and get in touch as our investigation turns up.
