Comparing International Healthcare Delivery Systems

Description
Each student will prepare a PowerPoint presentation, including detailed speaker notes in APA format, examining an international health system compared to the reformed U.S. health system.

Directions:
Students will prepare the presentation using PowerPoint that will provide:

- a discussion of the country, culture, and governance structure compared to the U.S. structure
- the historical background of the development of the health system including a description of the health system type, cost analysis, and funding stream compared to the reformed U.S. system
- a discussion of systematic and financial health policy issues that would indicate success or failure driven by politics in each country
- a discussion of the health system’s performance including outcomes, and a comparative analysis of costs compared to the U.S. health system

The presentation will be professional and include:

- speaker notes that are detailed and cited with the most current information available and matching references on the reference slide no older then 2010
- slides that are cited and contain no more than 40 words per slide with matching references on the reference slide
- graphics that are cited with a matching reference on the reference slide
- written permission for graphics that hold a copyright
- a title page slide at the beginning and a reference slide at the end in APA format
- 15 slides counting the title slide and reference slide

Each student will post the presentation to Doc Sharing for review by peers and to the Dropbox for grading by day three of Unit 7. Each student will also post two questions in the Unit 7 Discussion topic 2 thread that will foster political debate.
